THE AUTHOR'S THOUGHT...

Research plays an important role in the field of economics. From the beginning of the project, the experience of doing an innovative work has been achieved. Though the entire plan & detailed study were intensive, it was important. We tried to put it in simple language.

There is a link between the subject & the table in the place where necessary. Highlights of the context are highlighted during the project. This topic of economics has not remained the case for any area. Its importance is increasing in every sector. We tried to show his influence in the health sector.

When we look at the PMBJP, we have a doubt regarding the quality control, but after using it we got relieved. Just as branded medicines Janaushadhi medicines were available at 80% to 90% low prices. People should to know and remove the misunderstanding about it.

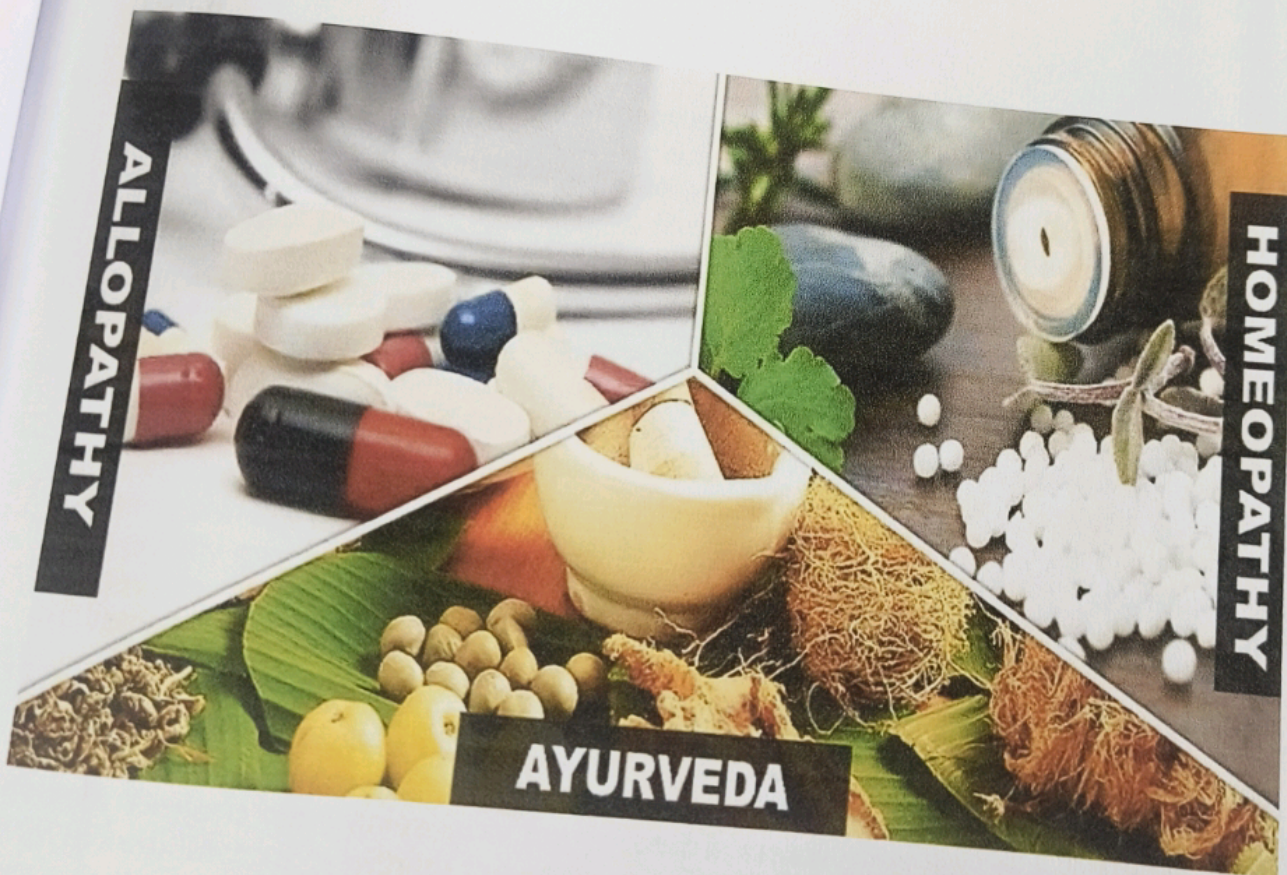

So, we chose this topic for the project work of BA III. Many new elements of the scheme are understood. Looking at the progress of 10 year we are happy to see the growing awareness among the people. This project has made us think ideologically.

● Homeopathy Medicine

Homeopathy is a system of alternative medicine created in 1796 by Samuel Hahnemann, based on his doctrine of *like cures* claim that a substance that causes the symptoms of a disease in healthy people would cure similar symptoms in sick people. Homeopathy is a pseudoscience – a belief that is incorrectly presented as scientific. Homeopathic preparations are not effective for treating any condition; large-scale studies have found homeopathy to be no more effective than a placebo, indicating that any positive effects that follow treatment are not due to the treatment itself but instead to factors such as normal recovery from illness

Pradhan Mantri Bhartiya Janaushadhi Pariyojna

Vision

*To bring down the healthcare budget of every citizen of India through
providing
"Quality generic medicines at Affordable Prices"*

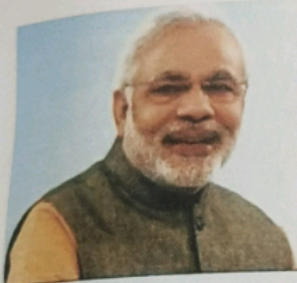

About BPPI

Bureau of Pharma PSUs of India (BPPI) is the implementing agency of Pradhan Mantri Janaushadhi Pariyojna (PMBJP). BPPI was established in December 2008 under the Department of Pharmaceuticals, Government of India. The Bureau has been registered as an independent society under the Societies Registration Act, 1860 as a separate independent legal entity in April 2010. BPPI follows the provisions of GFR, 2017 as amended from time to time, the CVC guidelines, and instructions from the Department of Pharmaceuticals.

Pradhan Mantri Bhartiya Janaushadhi Pariyojna Kendra (PMBJPK) is a campaign launched by the Department of Pharmaceuticals, Govt. Of India, to provide quality medicines at affordable prices to the masses through special Kendra's known as Pradhan Mantri Bhartiya Janaushadhi Kendra. Pradhan Mantri Bhartiya Janaushadhi Pariyojna Kendra (PMBJPK) have been set up to provide generic drugs, which are available at lesser prices but are equivalent in quality and efficacy as expensive branded drugs. BPPI (Bureau of Pharma Public Sector Undertakings of India) has been established under the Department of Pharmaceuticals, Govt. of India, with the support of all the CPSUs for co-coordinating procurement, supply and marketing of generic drugs through Pradhan Mantri Bhartiya Janaushadhi Kendra.

CONCLUSION

The PMBJP (Pradhan Mantri Bhartiya Janaushadhi pariyojna) must be called a revolution in health & science. Considering the increasing market value of day to day, it was not possible for ordinary people to buy very important and compulsory medicines. PMBJP started to improve the quality of India's economic potential and changing per-capita income. Lowest price supply of quality medicines has started. Therefore, the reduction in deficiency of medicines will be reduced. Life was increased, and a capable class was created. This plan is to be a milestone in the socio-economic development of India. Every person should be aware of the need to spread and propagate the scheme and take advantages of it.

"The poor must have access to affordable medicines, the poor must not lose their lives because of lack of medicines... that's why Jan Aushadhi Kendras have been planned across the country"

SUGGESTION

- "Changing Economy in Medicines" project focus on only 10-year periods of scheme progress.
- proper awareness about scheme is important so that eligible person can get the benefits.
- At the school, college arrange the camps and give them information about scheme. It is necessary to raise awareness.
