no. 1 Broad Questions (Any four)

49
50

① Describe the net banking account opening procedure.
The net banking account opening procedure typically involves these steps.

1. Visit the bank's website & navigate to the online account opening section.
2. Fill out the online application form with your personal details, such as name, address, contact information, & identification details.
3. Upload scanned copies of necessary documents, like identification proof (e.g. passport, driver's license) & address proof (e.g. utility bills, rental agreement).
4. Once the form is submitted, you may receive an acknowledgement or reference number for tracking your application.
5. The bank may verify your details internally or through a third-party agency.
6. Once verified, the bank will activate your net banking account & provide you with login credentials, usually via emails or SMS.
7. You can then log in to your net banking account using the provided credentials & start banking online, accessing various services like fund transfers, bill payments, & account statement.

4. What are the Functions of Real Time Gross Settlement (RTGS)

Real Time Gross Settlement- (RTGS) systems serve several key functions in the financial sector.

1. Real-time Settlement: RTGS enables immediate & final settlement of interbank payments. This means that transactions are processed individually, in real-time, & settled instantly.
2. High-value Transactions: RTGS systems are primarily used for processing high-value transactions. They ensure the swift & secure transfer of large sums of money between financial institutions.
3. Risk Mitigation: By settling transaction in real-time, RTGS reduces counterparty risk & system risk in the financial system. It helps prevent the buildup of large payment obligations between banks.
4. Liquidity Management: RTGS systems facilitates efficient liquidity management for financial institutions by providing immediate access to funds upon settlement. This helps bank manage their cash flows effectively.
5. Regulatory Compliance: RTGS systems often incorporate regulatory requirements, such as anti-money laundering (AML) & know your customer (KYC) measures, to ensure compliance with financial regulation.
6. Cross-border Payments: Some RTGS systems also support cross-border payments, facilitating international trade & finance by providing secure & timely settlement of transaction between countries.

Que. 2 Short Notes (Any Two)

1) Functions of NEFT

→ NEFT (National Electronic Funds Transfer) is an electronic funds transfer system used for transferring money between different bank accounts in India. Its functions include:

- ① Transfer of Funds: NEFT facilitates the transfer of funds from one bank account to another within the country.
- ② Interbank Settlement: It serves as a platform for interbank settlements, enabling banks to settle transactions efficiently.
- ③ Online Transactions: NEFT allows individuals, corporates, & businesses to initiate online transactions conveniently.
- ④ Scheduled Payments: Users can schedule payments for future dates, making it suitable for recurring transactions like EMIs, bills & salaries.
- ⑤ Low Transaction Costs: NEFT Transactions typically have low transaction costs compared to other modes of fund transfer like RTGS (Real Time Gross Settlement) & IMPS (Immediate Payment Service).
- ⑥ Convenience: It offers convenience to customers by providing a secure & efficient way to transfer funds without the need for physical visits to bank branches.

5/ Overall, NEFT plays a crucial role in facilitating electronic fund transfers & promoting digital transactions in India.

- ① Online Banking: IT allows customers to access their accounts, transfer funds, pay bills, & perform various transactions online through web portals or mobile apps.
- ② ATMs (Automated Teller Machines): IT powers ATMs, allowing customers to withdraw cash, deposit funds, check balances, & perform other basic banking tasks conveniently.
- ③ Core Banking Systems: Banks use IT to manage core banking functions such as account management, transaction processing, & customer relationship management.
- ④ Risk Management: IT systems are employed for real-time monitoring of transactions to detect fraudulent activities & manage risks associated with lending, investments & regulatory compliance.
- ⑤ Data Analytic: Banks utilize IT tools for analyzing vast amounts of data to gain insights into customer behaviour, market trends, & risk assessment, aiding in decision-making processes.
- ⑥ Customer Relationship Management (CRM): It enables banks to track customer interactions, personalize services, & offer targeted marketing campaigns to enhance customer satisfaction & loyalty.
- ⑦ Cybersecurity: It plays a critical role in safeguarding services, customer data & protecting against cyber threats such as hacking, phishing, & malware attacks.
- ⑧ Mobile Banking: With the proliferation of smartphones, banks leverage IT to provide mobile banking services, allowing customers to manage their finances on the go.
- ⑨ Blockchain Technology: Some banks explore the use of blockchain for secure & transparent transactions. Particularly in areas like cross-border payment & trade finance.

③ Define a E-banking. Explain the important features of E-banking.

E-banking also known as electronic banking, refers to the provision of banking services & transaction through electronic means, primarily via the internet. It allows customers to conduct various banking activities remotely without visiting a physical bank branch.

Important Features of e-banking include :

1. 24/7 Accessibility : Customers can access their bank accounts & perform transactions at any time of the day, providing convenience & flexibility.
2. Online Account Management : Customers can view their account balance, transaction history & statement online, enabling better financial management.
3. Fund Transfer : E-banking facilitates transferring funds between accounts, both within the same bank & to accounts in other banks, often with immediate or quick processing times.
4. Bill Payment : Users can pay bills online, including utilities, credit card bills, loan payment, & other recurring expenses, saving time & efforts.
5. Mobile Banking : Many e-banking services offer mobile apps, allowing customers to conduct banking transactions using their smartphones or tablets.
6. Security Features : E-banking platforms incorporate robust security measures such as encryption, multi-factor authentication, & secure login procedure to protect customer's sensitive information & transaction.
