PPT

2. The Anal Stage

THE ANAL STAGE

- During this stage the child learns that one cannot totally depend on the mother for everything.
- The child realizes that there are some things that it must do by itself.
- The child undergoes toilet training, acquires other skills.
- The child internalizes two separate roles, one's own and that of the mother.
- It is taught to distinguish between wrong and right actions through a system of reward and punishments.
